CARRIER OBJECTIVE

Seeking a SDE role in a reputable organization where I can apply my engineering skills to drive the company's success while expanding my knowledge through new experiences and challenges.

EDUCATION

- **(BTech) - GMR Institute of Technology, Rajam.** 2022-2025
(Information Technology) CGPA: 8.3
- **(Diploma) - Government Polytechnic, Vijayawada.** 2019-2022
(Civil Engineering) Percentage: 79
- **Class-X** 2019
ZPH School Koduru, Andhra Pradesh GPA: 9.8

INTERNSHIPS

Pixelvind pvt.ltd | FullStack Web Design and Development- (Dec 2024 to April 2025) - Visakhapatnam

- Contributed to full-stack web development projects like Collaborative Workflow Management and Task Allocation, focusing on building a collaborative, user-friendly, secure, and responsive application.
- Built collaborative task management systems with contributions to both frontend and backend development during the internship.
- Gained hands-on experience in full-stack development using React.js, Node.js, Express.js, JSP, Mysql and MongoDB, while working on real-time projects and enhancing web design skills

Internship Studio-CIT | Web Designing and Development - Virtual Internship

- Developed several web projects, including an Automated Smart Job Application System designed to assist job seekers.
- Contributed to full-stack web development project both frontend and backend operations, focusing on building a collaborative, user-friendly, secure, and responsive application.
- Worked across the full stack using React.js, Node.js, Express.js, MongoDB, HTML, CSS, and JavaScript.

SKILLS

Programming Skills : Python, C.
Web Technologies : React js, Next js, HTML, CSS, Bootstrap, MongoDB, MYSQL, Jenkins.
Soft Skills : Multi Tasking, Team Lead, Problem solving, Time Management, and Communication.
Hobbies : Valley Ball, Pencil drawing, listening to music, Browsing new technologies.

PROJECTS

• COLLABORATIVE WORKFLOW MANAGEMENT AND TASK ALLOCATION.

This Project involves creating systems that help manage tasks and workflows collaboratively, Tracks daily task progress within projects, enabling team leaders to assign tasks and teammates to complete them within Time. Reduces the need for frequent meetings, allowing leaders to monitor progress directly via the application.

– **Tools and Technologies used:** vs-code, Next js, MongoDB, Node js, GitHub, Bootstrap, Vercil, Render.

• WORKLOAD MANAGEMENT AND SUBSTITUTION SYSTEM FOR FACULTIES

A faculty-friendly application that notifies eligible faculty members by email when a substitute is needed, following a First-Come-First-Serve (FCFS) approach. Key features include an easy-to-apply process, expiration handling, time limits, authentication, automated email notifications using Nodemailer, and a responsive user interface.

– **Tools and Technologies used:** vs-code, MERN-Stack, GitHub, Bootstrap, Vercil, Render.

• AUTOMATED SMART JOB APPLICATION SYSTEM

An automated system that personalizes and sends job applications with resumes to HR contacts, streamlining the job search process for seekers. It is user-friendly and highly efficient, ensuring a seamless and professional application experience.

– **Tools and Technologies used:** vs-code, Github, MERN stack, Render, Vercil, Bootstrap, Github.
